Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 26, 2005 has been entered.

Claim Objections

Claim 18 is objected to because of the following informalities: In line 1, delete "further comprising an airflow control valve". The above phrase limitation is duplicated. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 15 is rejected under 35 U.S.C. 102(b) as being anticipated by USPN 4,004,372 to Beard et al. Beard et al discloses a sliding door device comprising; a cable (20a) having a first end attached to a door frame during use; at least one tensioning means (H) tensioned by the cable during use; and an air piston (E) including a piston rod (35) linked to the tensioning means, the

Art Unit: 3677

piston rod causing a pushing action as the piston rod is moved into the air piston, thus providing a controlled release of the tension in the tension means to control closure speed of the sliding door during use.

As to claim 18, the sliding door device further including an airflow control valve (40) within a wall of the piston for controlling intake and outlet and controlling closure speed of the sliding door.

Allowable Subject Matter

Claims 16, 17, 19 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claims 1-14 and 21-24 are allowed.

Response to Applicant's Arguments

Applicant's arguments filed in the Amendment on September 9, 2005, with respect to the rejection(s) of claim(s) 15 and 18 over #5,622,007 to Archer have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, due to applicant's necessity to amend the claims, further consideration has been performed, thus a new ground(s) of rejection is made in view of applicant's amendment to the claims, in particular, #4,004,372 to Beard et al has been cited, made of record and applied to meet the claim limitations as currently presented. Accordingly, claims 15 and 18 have been found to be unpatentable over Beard et al. Claims 1-14 and 21-24 are allowed over the prior art and claims 16, 17, 19 and 20 are objected to.
